

Aladar Tepelea joins promerget as Partner

AI-native M&A boutique expands its partnership to bring AI-driven deal support to owners, investors and new industries

Lahnstein, 15 October 2026 – promerget GmbH, the AI-native M&A boutique for the DACH mid-market, has appointed Aladar Tepelea as Partner. Together with founder Johann Horch, Tepelea will extend promerget's offering to private equity and venture capital firms, wealth managers and business owners, and open the platform to partners from further industries.

promerget combines hands-on transaction experience with 300 AI agents led by six proprietary lead agents that cover every stage of a deal: target scouting (ATLAS), financial due diligence (NEXUS), legal due diligence (CIPHER), valuation (QUANTUM), buyer and partner matching (VECTOR) and post-merger integration (ORACLE). The agents work in parallel rather than one after the other; every critical decision remains with people. The firm focuses on FinTech/WealthTech and Travel Tech, with deal sizes from €10 million to €250 million, and supports sell-side, buy-side and buy-and-build mandates including post-merger integration.

Johann Horch brings the practical experience behind the model: within three years he led ten acquisitions, integrated seven brands, ten locations in five countries and around 300 people onto one platform, and completed the exit to a private equity investor.

Aladar Tepelea has built ventures, developed investment technology with ALLINDEX and has long worked on how artificial intelligence changes the way companies operate. He brings an established network of owners of wealth management firms, private equity and venture capital investors, and entrepreneurs from a range of industries.

"In the old world, people did the grunt work. Today our agents do it – and that frees us for what decides every deal: trust, negotiation and the conversation with the owner. With Aladar we gain a partner who brings exactly these relationships and a deep understanding of technology," says Johann Horch, founder and Managing Director of promerget.

"What happens when decades of dealmaking experience meet hundreds of AI agents? I want to find out – and make sure owners and investors are the first to benefit from it," says Aladar Tepelea, Partner at promerget.

With immediate effect, promerget offers:

- Private equity, venture capital and wealth managers: AI agents working directly inside their deal flow – more targets screened, faster decisions.
 - Business owners: personal guidance through the entire transaction, from the first idea to closing and beyond.
 - Partners from other industries: jointly training the agents on new markets and sharing the knowledge.
